Nunes, (2005) Economic valuation of on-site material damages of high water on economic activities based in the city of Venice: results from a dose-response-expert-based valuation approach, in T. Spencer and C. Fletcher (eds.), Flooding and Environmental Challenges for Venice and Its Lagoon, Chapter 26, Cambridge UK, Cambridge University Press.

M. Breil, C. Giupponi, P. Rosato, e L. Chiarullo, (2005) Sant'Erasmus, L'isola Agricola della Laguna di Venezia: Potenzialità della Gestione Integrata delle Zone Costiere (GIZC) e Prospettive di Sviluppo; FEEM, Rapporti sullo Sviluppo Sostenibile.

## Projects

VALULAGUNA "Evaluation Of Environmental Upgrading Work On Islands In The Venice Lagoon: A Spatially-Distributed Hedonic-Hierarchical Approach". The objective was to analyse how advanced methods of geographical modelling can be integrated with economic valuation methods to produce synergies that can improve and simplify the economic valuation of state projects.

VALU\_CS – The Valuation of Urban Improvement in Venice: Hedonic-Hierarchic Model implemented in GIS, for the valuation of impacts from urban improvements on the residential buildings of the historic centre of Venice.

ACQUE ALTE, "Economic Assessment of Short Period Direct Impacts of High Water on the Economic Activities in Venice" Assessment of high water damages to economic activities in the historic centre of Venice.

ICZM-VE - Integrated Coastal Zone Management in the Venice area. Valuation methods in a geographical context" The project aimed to develop an ICZM methodological framework in order to deal with the complex set of social, economic and environmental issues which sectoral applied and tested on a limited area of the lagoon (the island of Sant'Erasmus).

ENCORA - European platform for sharing knowledge and experience in coastal science, policy and practice. The project aims at creating a common platform for scientists, politicians and practitioners working for integrated coastal zone management. Specific task: host officer for the thematic network dedicated to Multifunctionality and Valuation within the Encora Platform.

EcoTour The project EcoTour aims at exploring aspects of sustainability of tourism in protected areas in three cases studies (Piemont, Lombardia and Veneto).

RAPIDO The project has been established to analyze best practices concerning the development of innovation and methods of knowledge transfer to different target groups in rural areas. Specific task in the project: responsible for the work package dedicated to best practice examples for innovation in rural areas and definition of indicators.
