

EFFICIENT BUILDINGS

IMPROVING ENERGY EFFICIENCY CAPACITIES IN PUBLIC BUILDINGS

The Efficient Buildings community of projects is featured by the partnership:

MEDNICE

The **overall objective of MEDNICE** is to empower MED projects' partners through the establishment of a MED community and a joint transnational framework around energy efficiency (EE) in public buildings.

How to achieve it?

By setting up training and peer learning mechanisms.

MEDNICE will also analyze and summarize EE practices through thematic and policy papers to be promoted and benefit the MED community using its network for a proper dissemination of the Modular Projects results.
