GLASGOW

COP26

IN PARTNERSHIP WITH ITALY

The Journey from Scientific insights to Societal Action

Invitation

We, the organisers of this COP side-event would like to invite you to join "The Journey from Scientific insights to Societal Action" under the topic "Science, technology, research and innovation". Our excursion will take place virtually on

Monday 1st November 2021 for one hour, at **11:30am** (GMT+1, **Glasgow time**)

07:30 EDT / 11:30 UTC / 12:30 CET / 13:30 EET / 14:30 MSK / 19:30 CST / 22:30 AEDT

(note: change to Winter Time on 31 October)

<https://www.cop26eusideevents.eu/>

Register and join our event "1.O.2" here

We will take a leap of faith and travel from one end of the spectrum to the other, from natural to social sciences, from theory to practice. The journey will show you how and why science and knowledge needs to be shared, in the context of Climate Change and the COP.

We are members from a interdisciplinary variety of organisations and projects (in order of appearance):

ECRA, the European Climate Research Alliance - a network of climate scientists of Europe

EUA, the European University Association - represents more than 800 universities and national rectors' conferences in 48 European countries

CMCC, the Euro-Mediterranean Center on Climate Change - presenting outcomes of the projects **SOCLIMPACT**, **COACCH**, and **PESETA**.

IIASA, the International Institute for Applied Systems Analysis - presenting **ENGAGE** project results.

CPA, the **Climate Psychology Alliance** - a network exploring the connection between climate science and the human dimension

Further information

To tackle climate change effectively, it is important that all levels of society have an understand

ing of climate change, and its risks and impacts. This session takes a journey from new scientific research findings about net-zero futures and climate change impacts, discussing recent developments in communication, education and public engagement, to arrive at policy and action.

We want to highlight the importance of scientific work in the context of societal needs and human behaviour; how do science, politics and decision-makers, universities, and all persons involved in Climate Change understand, create and deal with new information and knowledge. The expected outcome of this event is to clarify the relationships and strategies between the stakeholders and to find possible solutions to better deal with Climate Change.

Join us on www.cop26eusideevents.eu, do not forget to register before joining our event. The **complete programme** of the COP 26 Side Events can be found at this website: www.cop26eusideevents.eu/programme

We look forward to seeing you online!
