

# WINTER SCHOOL ON FIRE BEHAVIOR, RISK AND MANAGEMENT IN THE CONTEXT OF CLI- MATE CHANGE

## OBJECTIVE

The main objective of the winter school is to provide PhD students, researchers, stakeholders and end-users with a clear and broad discussion on topics, methodologies and case studies to understand the phenomenon of large fires, from the behavior to the management, also considering the context of the urban-forest interface and current and future climate changes.

## WHEN

26 total hours spread over 4 days

1 Launch event February 7, 2022

Lessons 11 and 25 February 2022 - 11 and 18 March 2022

## WHERE

The training activities will take place online

*The winter school is organized as part of the "MED-Star" strategic project and the simple "INTERMED" project funded by the EU through the Italy-France Maritime Program (2014-2020)*

## ORGANIZED BY

## PARTECIPATION

The online course will bring together motivated working professionals, stakeholders, doctoral and post-doctoral students. Participation is free. At least 60% of the positions will be reserved for candidates from the Project areas (Sardinia, Liguria, Tuscany, Corsica and the PACA Region). The school will be limited to a maximum of 45 participants.

## REGISTRATION

Applicants must complete the online application form detailing the motivation by January 10, 2022

**La cooperazione al cuore del Mediterraneo  
La coopération au cœur de la Méditerranée**

## CONTEXT & THEMES

The first decades of the XXI century have seen some of the most catastrophic fire events in terms of their impact on society. The evident changes in the trend of the fire regime are mainly due to two factors: (i) on the one hand the weather / climatic conditions in a context of global warming, and (ii) on the other hand a greater predisposition to fires of the landscape, due to changes in land use and land cover during the XX century

The Winter School addresses the most recent advances and results in four major themes:

- large fires and predisposing factors (environmental, physical, economic, social aspects);
- fires in the urban-rural and urban-forest interface;
- fire risk prevention, planning and management towards fire-smart communities;
- adapt the territory to climate change (strategies, approaches, methods and tools).

## SCIENTIFIC COMMITTEE

**Donatella Spano—Costantino Sirca—Serena Marras**  
University of Sassari

Fondazione CMCC - EuroMediterranean Center on Climate Change

**Valentina Bacciu**

National research Council - Institute of BioEconomy  
Fondazione CMCC - EuroMediterranean Center on Climate Change

## ORGANIZING SECRETARIAT

**Matteo Funaro—matteo.funaro@cmcc.it**  
**Claudio Ribotta—cribotta@uniss.it**

## LECTURER

**Davide Ascoli** | University of Torino

**Valentina Bacciu** | CNR - Institute of BioEconomy —  
Fondazione CMCC - EuroMediterranean Center on Climate Change

**Anna Barbati** | University of Tuscia

**Christophe Bouillon** | INRAE  
National Research Institute for Agriculture, Food and Environment

**David Caballero** | University of Sassari

**Valentina Mereu** | Fondazione CMCC - EuroMediterranean Center on Climate Change

**Serena Marras** | University of Sassari—Fondazione CMCC - EuroMediterranean Center on Climate Change

**Maria Mirto** | Fondazione CMCC - EuroMediterranean Center on Climate Change

**Michele Salis** | CNR - Institute of BioEconomy

**Costantino Sirca** | University of Sassari—Fondazione CMCC - EuroMediterranean Center on Climate Change

**Antonio Trabucco** | Fondazione CMCC - EuroMediterranean Center on Climate Change

**Domingo X. Viegas** | University of Coimbra - ADAl Association for the Development of Industrial Aerodynamics
